GitHub

The screenshot shows the GitHub profile page for user JayC22. The browser's address bar displays the URL `https://github.com/JayC22`. The profile includes a large blue GitHub logo avatar, a bio section with an "Add a bio" link, and an "Edit profile" button. A "ProTip!" banner suggests updating the profile. The statistics section shows 0 repositories, 0 stars, 0 followers, and 0 following. The "Popular repositories" section is empty, displaying the message "You don't have any repositories yet." The "1 contribution in the last year" section features a contribution graph with a single green square on January 1st. Below the graph, a note explains that the first green square represents joining GitHub and that more contributions lead to darker green squares.

GitHub Repository `https://github.com/JayC22/cmpt220CASANOVA.git`

The screenshot shows the GitHub repository page for `cmpt220CASANOVA` under the user JayC22. The browser's address bar displays the URL `https://github.com/JayC22/cmpt220CASANOVA`. The repository page includes a search bar, a "Pull requests" button, and a "Gist" button. The repository name is `JayC22 / cmpt220CASANOVA`, and it has 0 watches, 0 stars, and 0 forks. The "Code" tab is selected, showing the repository's content. The page provides instructions for setting up the repository, including a "Quick setup" section with a "Set up in Desktop" button and a "HTTPS" button, and a "SSH" button. The repository URL is `https://github.com/JayC22/cmpt220CASANOVA.git`. The page also includes a "We recommend every repository include a README, LICENSE, and .gitignore." section. Below this, there are two sections: "...or create a new repository on the command line" and "...or push an existing repository from the command line", each with a code block containing the necessary Git commands. The first code block is:

```
echo "# cmpt220CASANOVA" >> README.md
git init
git add README.md
git commit -m "first commit"
git remote add origin https://github.com/JayC22/cmpt220CASANOVA.git
git push -u origin master
```

The second code block is:

```
git remote add origin https://github.com/JayC22/cmpt220CASANOVA.git
git push -u origin master
```

At the bottom of the page, there is a link to "or import code from another repository".
